## Country Life Kids Camp Wilderness Club

### After-School and Weekend Exploration for Ages 6-17

The goal of the Wilderness Club is to spark exploration and provide fun and engaging experiences that grow our knowledge of the natural world for ages 6-17. We strive to help our explorers connect to nature in ways that will help them grow their **leadership skills, survival skills and character!** Our exceptional and unique Wilderness Club programs are offered as after-school or weekend opportunities. Each program includes 6 hours of outdoor instruction, hands-on activities, engaging demonstrations and interactive problem-based learning experiences in nature.

An important part of our Wilderness Club is our custom achievement badge and certification program. **Earning a badge is a rewarding experience that teaches you how to serve, lead and explore.** We believe that everything you do matters and the value gained from these experiences will prove as stepping stones for bigger life and school opportunities. Additionally, if your kids are in grades 7-12, they will receive an additional certification letter to help them shine when seeking admissions into honor societies, clubs, private high schools, colleges and more! This letter will be personalized for use as a recommendation letter or proof of participation. We are proud to have a 100% success rate on referral letters we have provided for our college *Staff in Training* students when applying for professional internships, studies abroad and job opportunities.

*“Country Life Kids Camp’s Wilderness Club, achievement badges and certification programs are a very valuable addition to the student resume, especially since they contribute to the development of skills such as survival in the outdoors, character building, team building, determination, facing challenges and much more.”*

**Dr. Dipika Mirpuri, Pharm. D., Bach of Engg.**  
**President, SAS Global Education**

**Want to explore even more rewarding experiences?** Check out our high school and college volunteer mentoring and leadership development programs called, *Camp Counselor in Training* and *Staff in Training*. These are all ways to get involved and make a difference.

**Join the club and enjoy 1 field trip within a program or journey through all 3 levels and earn an achievement badge for all ages! Earn all 7 achievement badges for the ultimate fun experience in nature!**

## Country Life Kids Camp Wilderness Club Programs

Spring and Fall 2021 - Programs available for ages 6-17 years old!

**Click on each box below for further descriptions via our website!**

[Click on the "Orienteering" and "Wilderness Survival" boxes for exclusive videos of our NEW programming!](#)

### Orienteering

- Learn how to explore nature through the sport of navigation using a detailed map. Grow your map reading and compass skills through a high-energy adventure of trail hiking and running where you are the navigator.

### Wilderness Survival

- Learn how to survive in Ohio's wilderness through a fun and immersive experience that will prepare you for almost any survival scenario nature may present.

### Fishing

- Get lured into a life-long sport of fishing. Learn everything from the basics to advanced techniques and become an avid angler. Dive into the depths of fish habitats and uncover secrets for reeling in the desired catch.

### Storm Chasers

- Get close to natural disasters through our hands-on weather lab and stations. Discover the scientific wonders that make the extremes of Mother Nature incredible.

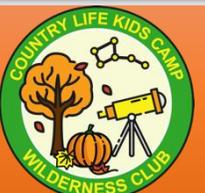

### Simple Machines

- Discover the magic of how to make work easier by using simple machines. Uncover the tricks to each simple machine through an interactive lab of engineering fun.

### Spring Exploration

- Springtime is a time of nature's blessings bringing young animals to life. Explore springtime habitats, both aquatic and forest, using trail cameras, GoPros, tracking techniques and good old-fashioned hands-on investigation. Then, spring into our hydroponics lab and gardens putting your horticulture skills to the test.

### Fall Exploration

- Fall is a time of beautiful transition with Mother Nature revealing amazing colors and incredible preparations as animals prepare for winter. Turn your eyes to the skies and learn about the stars above and the beauty that comes with fall star gazing. Then, enjoy a special engineering edition of pumpkin launching when fall fun will be soaring!
